

cargofleet Truck

The optimal solution for trucks and tractor units

- » Precise positioning, vehicle data and order management
- » Quality assurance and process optimisation
- » Technical and economic analysis
- » Efficient fleet management

Piece by piece: Top quality

Fast, flexible and on time – this is what your customers expect from you as a transport company. With cargofleet from idem telematics, you can achieve this easily. From scheduling to billing: Workflows are easier, clearer and more cost effective.

With cargofleet you have your deliveries safely in view:

- » Vehicle location
- » Guidance and transmission of all delivery data incl. time and location stamp
- » Processing progress and time tracking of your journeys
- » Loading and unloading control
- » Driving style analysis via adjustable criteria
- » Driving time overview and tachograph data collection

Profit from cargofleet Truck

EFFICIENCY

- » Efficient use of vehicles and fleet management
- » Efficient driver assistance
- » Control of orders at all time
- » Reduction in the displacement of empty vehicles and vehicle standstill periods
- » Optimised transport and settlement process
- » Order transmission and processing
- » Less consumption, less wear
- » Uninterrupted operation

DOCUMENTATION

- » Performance record with date/time and location stamp
- » Recording of working hours and expenses, in cooperation with partners
- » Information on driving time and rest periods
- » Routes and consumptions costs
- » Continuous driving style analysis and improvement

QUALITY

- » Increased customer satisfaction
- » Increased vehicles utilisation
- » Easy integration of your subcontractors
- » Continuous digital information chain
- » Objective data acquisition and data consistency
- » Error avoidance in order processing

MAKE ONE OUT OF TWO

- » One database for all collected data
- » One data analysis from truck and trailer
- » Access via one web portal
- » Single supplier contact for contract management, invoicing and support
- » The overall solution for truck and trailer telematics

There are partnerships and interfaces to leading logistics and ERP software solutions. The coupling to the systems is done via an easy to set up web-based method.

GPS/GLONASS Positions
GSM/GPRS Data communication International

Order management and disposition
Order data for driver
Current order status and delivery data

Driver performance feedback whilst driving
Assistant for economic and environmentally-friendly driving
Driver ranking

Identification which truck is coupled with which trailer*

Navigation
Truck restrictions and traffic conditions
Arrival times

Tachograph data
Driver card data

Area monitoring
Messages when entering/leaving predetermined areas

Current driving times
Remaining daily/weekly driving times

Technical data from the CAN Bus

*requires the use of the TC Truck and TC Trailer Gateway/TControl terminals

Analysis + Reports
Optional functions
Tour analysis
